

KGS DIY/Hardware

PREMIUM COATED ABRASIVES

KGS DIY/Hardware Products

Ideal for the home handyman or semi-professional, KGS range of high-quality discs are perfect for working on ...metal...stone...wood.

KGS of Spain has been successfully producing and selling premium coated abrasives around the world for over 20 years.

The KGS range of easy-to-use, cost-effective discs for the DIY / Hardware market have been especially designed for sanding, dry grinding, polishing and cleaning of various materials including metal, stone and wood. Great for use on metal garden furniture and pipes, removing paint from wood or grinding stone and concrete.

Our discs work on portable grinders or power drills with an arbour adapter, with the suitable dimensions for the selected disc.

Below find a summary matrix for the range of products:
