

KGS PRESS INFORMATION Stone-tec NURNBERG

KGS Diamond, headquartered in Switzerland, comes to the Stone-Tec exhibition in Nuremberg with more than 10 new products and innovations that bring higher levels of Quality and important "COST SAVINGS" to our customers. KGS Diamond, again, meets the challenge of tough market conditions!

- **CLS; A unique Center-Locating-System (patent applied) for diamond discs**

Offers improved comfort, precision and safety with QRS polishing discs used on Hand Machines. A simple male & female fitting on the diamond disc and back up pad makes this innovation so simple but so valuable in daily working conditions. The disc is quickly & securely attached to the back up pad and perfectly centered every time!

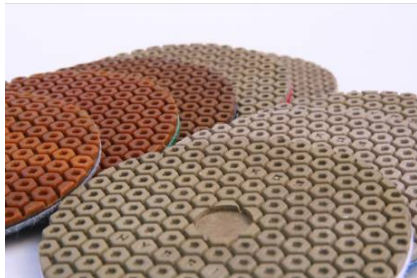

- **Continued development of the KGS Hybrid range of QRS polishing discs, now including the KGS Hybrid Super (new), the KGS Hybrid (the original Hybrid) and the KGS Hybrid ECO (new).**

The KGS HYBRID range designed to use wet & dry (on natural & engineered stone) now brings an Industrial level tool with the KGS Hybrid Super, giving the longest lifetime in the market, and now also the KGS Hybrid ECO, bringing all the capability of the KGS Hybrid range, but in an economically priced version of the Hybrid technology.

KGS HYBRID® SUPER

KGS HYBRID® (Standard)

KGS HYBRID® ECO

- **Extension of saw blade ranges KGS SPEEDLINE® CUT with Ø 300 – 600 mm for Granite and engineered Stone.**

Designed to compete at the very highest performance levels for QUALITY sawing of Granite & engineered stone, these saw blades manufactured by KGS are all produced with Silent Cores and with diamond segment heights of 12mm, 16mm and 20mm, giving customers a choice of true sawing QUALITY, at different price levels.

These blades deliver the quality and cost to satisfy every application of straight sawing and the demanding applications in the Kitchen Top industry such as 45 degree angle sawing.

Keep your edge against the competition with this new range of KGS Speedline® Cut Saw Blades!

- **New KGS CNC Drills \varnothing 10, 15, 18, 20, 25, 35, 36, 38, 40, 60, 70**

A new range of CNC drills manufactured by KGS represents a new standard in drilling performance, giving excellent hole quality combined with exceptional drilling speed! These new CNC drills are all designed to deliver Swiss Diamond Technology at an affordable price.

- **KGS Floor Grinding and Polishing for Natural Stone**

KGS continues its tradition of Quality & Innovation by launching a range of machines & KGS diamond products for grinding and polishing of Natural Stone floors. Customers will benefit from the more than 20 years of KGS experience in this technical market. Again, with a focus on Quality and cost savings, KGS will deliver a package that brings a beautiful floor everytime!

All product launches of KGS will go along with interesting offers to make sure it is always interesting to visit the KGS stands 7-308 / 7-306 in Hall 7.
