#### KGS Grit Size Range

50 60 120 200 320 400 500 800 1500 3000 10000

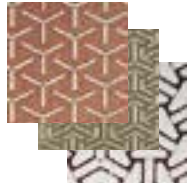

# KGS® Flexible Diamond

INDUSTRIAL - KGS Telum® Belt

## KGS® Flexible Diamond Abrasives

WET

INDUSTRIAL

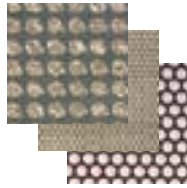

### KGS Telum®

KGS Telum® is KGS Diamond's patented inter-locking arrow pattern of flexible diamond abrasives. Telum's unique flexible design and manufacturing technique enables the product to achieve a similar precision to conventional rigid tools, but with a greater performance.

### Advantages

- Predictable, consistent finish
- Optimum price performance
- Extra long lifetime

PROFESSIONAL

### KGS Flexis®

KGS Flexis® is KGS Diamond's professional standard dot-pattern range of highly flexible diamond abrasives for grinding and polishing. KGS Flexis® has a high temperature resistance compared to our competitors due to superior heat dissipation, perfect for professional applications.

- Long lifetime
- Superb price performance ratio
- Excellent finish

ECONOMICAL

### KGS Swiflex® QS

KGS Swiflex® QS is KGS Diamond's economical Swiflex-pattern range of flexible diamond abrasives for grinding and polishing. KGS Swiflex® QS is mostly used for general purpose applications.

- High stock removal
- Solid price performance ratio
- Good finish

## KGS Solutions

Our three tier solution system provides a simple and easy buying guide.  
See our catalogue for the full range of Speedline Products:

### Industrial Solutions

- The ultimate in high performance and long life
- Industrial and hi-tech environment
- Higher price bracket

### Professional Solutions

- Above average performance
- Medium sized industries
- Medium price bracket

### Economical Solutions

- Good performance
- Small to medium sized industries
- Lower price bracket
